Valois: how does this modified version sound for sending to John and Blake?

Greetings John: we all survived the holiday (and the winter weather) last week and are back in the office this week.

We apologize for not following up earlier from our last call with you and Lisa on October 16th about your concerns regarding Section 15 of the draft Class III fact sheet and the Cadmus document *Geochemical Model Acceptance Criteria Checklist for the Dewey-Burdock Project*. Since that call we re-reviewed these documents and identified a number of disconnects including some of which you pointed out. To protect the integrity of the public participation process, etc., we will not be changing the existing administrative record for draft permit issuance. Accordingly, we recommend that Powertech provide a comment stating that the EPA should clarify the purpose of the Cadmus checklist document as it relates to Class III permit requirements. We would then address these disconnects as part of our final permit decision making process.

Were there other questions you had not related to the above discussion? If so, we can schedule some time with you and Blake tomorrow at the earliest.

Thanks,

Douglas

Subject: Can we schedule a conference call Monday?

Douglas and Valois,

Hope you had a great Thanksgiving. Happy Belated Thanksgiving from all of us.

We were hoping to schedule a conference call (myself and Blake would be on the call) to ask some brief follow up questions from our last meeting. Would it be possible to speak Monday morning or late afternoon?

Thanks.

John
